

Environmental Policy Statement

Metallic Resources, Inc. provides invaluable services to the electronic manufacturing industry. We provide the purest solder products available anywhere in the world in addition to scrap solder recycling services. In so doing we recognize that our products and recycling services could have a substantial impact on the environment. Thus, we are committed to ensuring that our soldering products are used in a manner that minimizes any threat to the environment and at the end of their useful life are recycled back into new solder products in processes that do not cause any harm to the environment.

Metallic Resources, Inc. also recognizes that we are heavily dependent on natural resources to run our business. It is of benefit to both the company and the environment that these natural resources be utilized as efficiently as is possible.

Metallic Resources, Inc. is committed to continually improve our products when possible to remove hazardous ingredients and to utilize the best available technology, equipment, and practices in our recycling processes when practical.

The above goals will be accomplished by continually enhancing and improving our environmental management system.

Metallic Resources, Inc. is further committed to:

- Encourage management at all levels to look for ways to continually improve our environmental management system.
- We are committed to satisfy all applicable requirements
- Prevent all forms of pollution whenever possible.
- Recycle when feasible and practical.
- Establish and review objectives and targets for the improvement and maintenance of the environmental system.
- Train all of our employees of their role in creating and maintaining a successful Environmental Management System program.
- Make available to the public, when requested, Metallic Resources, Inc. Environmental Policy and Procedures.

Implementation of this policy is a fundamental management objective. It is the responsibility of each employee to understand how their actions and job responsibilities impact the environment.

Sincerely,

Stanley R. Rothschild Jr.

President
